

# 30 new employees over the next three years at VisionID in Tipp

VisionID, a leading systems integrator and managed service provider in south Tipperary, has launched their very own corporate academy.

The VisionID Academy offers tailored programmes in career areas such as sales, IT and operations with progress into full-time roles in VisionID.

According to a McKinsey & Company study, businesses have surprised themselves with the speed and success of their digital initiatives in response to the Covid-19 pandemic.

On average, digital transformation has made the equivalent of seven years of progress in a matter of months.

In line with these trends VisionID has been doing extensive work on developing our portfolio so we can support our customers through this change.

As a result of adding to our portfolio VisionID has hired

10 new employees through the pandemic and looks to sustain this growth by hiring 30 new employees in the next three years.

These programmes are tailored to the individual based on experience and areas of interest.

VisionID's entry level programmes are suited to those with no relevant qualification but a desire to learn more about VisionID and the industry. Whilst their intermediate and senior programmes are designed for people coming from university or who have

previously worked in their specified interest area before. The programmes are ICT accredited up to the equivalent of a Level 8.

To celebrate the launch of the VisionID Academy, VisionID are inviting those who are interested to attend their Virtual Open Days on August 4 and 18.

Those who attend the open days will get a full overview of VisionID and the VisionID Academy, while also engaging with VisionID Employees and Managers based in your area of interest.

In 2019, VisionID was

proudly named the winners of the award for Best Employer for Training, Development and Well Being, at the Tipperary Business Awards.

"Since opening its doors in 2000, VisionID has made the training and development of our employees a top priority and opening an academy has been a goal of ours for years," said Robert Jones, Managing Director at VisionID.

At VisionID, our mission is to optimise businesses

operational efficiency and productivity by connecting our client's physical and digital operations. We provide our clients with complete visibility of their critical assets and information. We do this by continuously innovating, driving disruptive solutions and investing in our high calibre dedicated team.

The VisionID academy hopes to start welcoming prospects from later in the summer of 2021.

## BUSINESS BRIEF

### Calls to support local papers

News outlets and local radio in Tipperary should benefit from State support in a proposed alternative public service media charge to replace the outdated TV licence fee, Fine Gael Senator, Garret Ahearn, has said.

The proposal is one of the main recommendations in the Fine Gael submission to the Future of Media Commission following a detailed survey and analysis on the local media landscape nationwide by the party with feedback from almost 100 key stakeholders.

#### IMPORTANT

Senator Ahearn said a cornerstone of the Fine Gael submission is strengthening and ensuring a successful future for regional newspapers, radio stations and media outlets serving their communities in Tipperary.

"A strong media sector is a cornerstone of a well-functioning democracy," he added.
